Beach Advisory Issued for North Beach at Goulds Inlet St. Simons

GLYNN COUNTY, GA – The Glynn County Health Department has issued an advisory for North Beach at Goulds Inlet (Fifteenth Street to Tenth Street) on St. Simons Island .

This advisory is only for the area(s) specified above and does not impact any other beaches on the island. This beach water advisory is to alert the public of a possible risk of illness associated with water contact but do not mean the beach is closed.

The Glynn County Health Department recommends you do not swim or wade in the water in the area(s) under advisory. Fish and other seafood caught from this area should be thoroughly washed with fresh water and thoroughly cooked before eating as should fish or seafood caught from any waters.

The area will be retested and the advisory will be lifted when tests show the bacteria levels meet the Environmental Protection Agency’s recommended standards.

For more information about beach water advisories, go to www.gachd.org and click on the Environmental Health tab at the top of the page.
