

## What differences can you expect with the new site?

- 1) The URL for the new system will be a change from the current sign in. Please access using the URL provided (you should bookmark this link):

<https://sslx.gta.ga.gov/dnr>

- 2) Enter the same username and password you use for Windows and Outlook at the following screen:

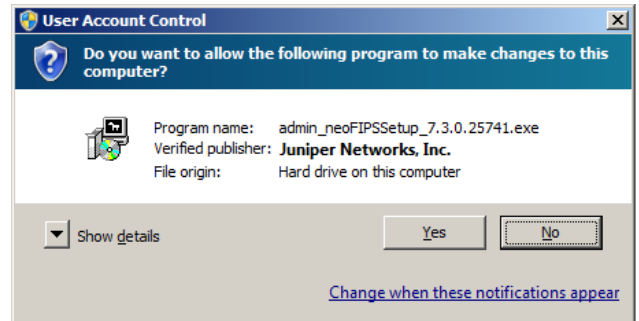

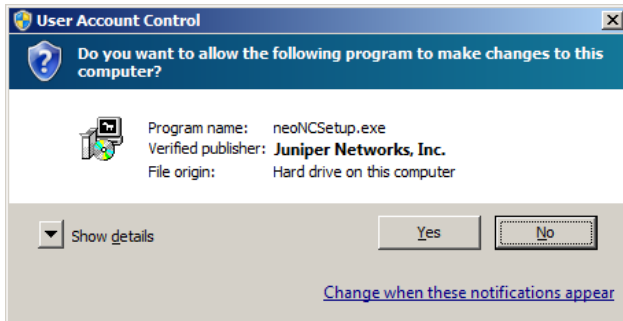

Welcome to the

### Department of Natural Resources SSL VPN

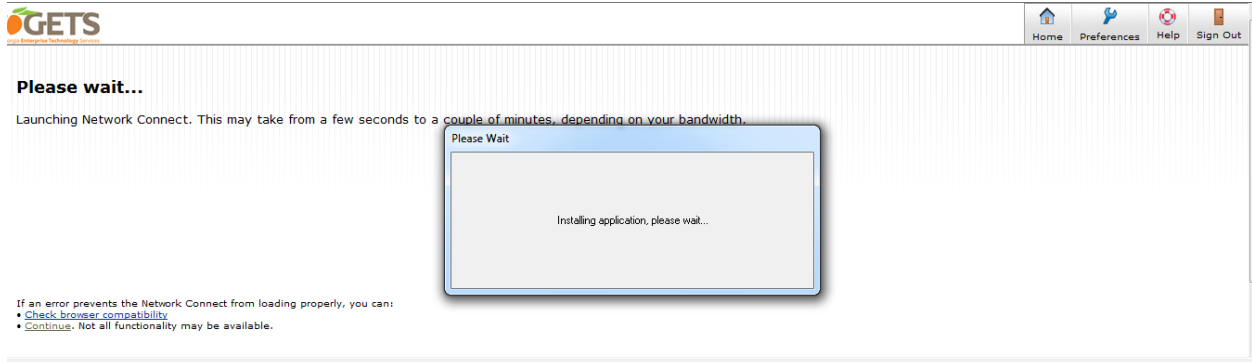

Username:   
Password:

You are attempting to access resources owned by the Department of Natural Resources. These resources are to be accessed by authorized users only. If you have not been specifically authorized to access these resources, do not proceed further. Unauthorized access could subject you to liability or criminal prosecution in accordance with the Georgia Computer Systems Protection Act (O.C.G.A. 20-9-90). Department of Natural Resources network communications and interaction are subject to monitoring, recording, auditing, retrieval and disclosure to third parties.

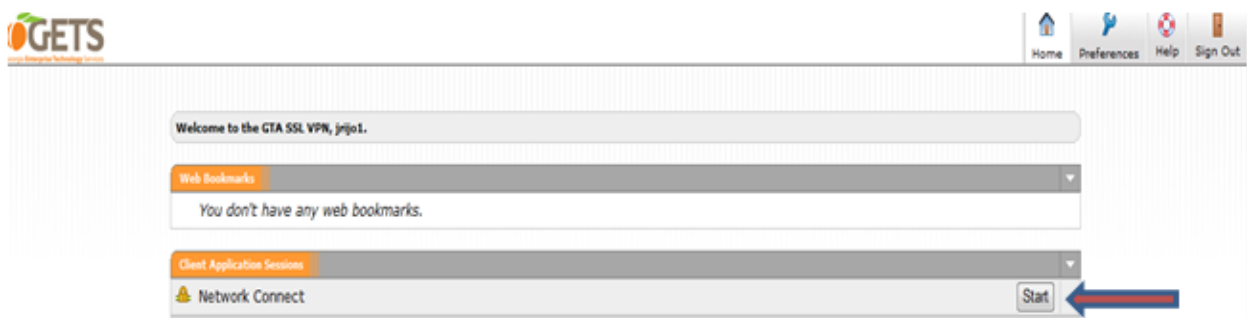

- 3) After successfully signing in the VPN appliance will attempt to install the “Juniper Network Connect” application and plug-ins that will allow you to use the SSL VPN service. Click “Yes” to both requests to install the components below:

- 5) Part of the process is a “Host Checker” inspection of your computer to verify that an anti-virus application like McAfee is installed and the virus definition files are at least ten revisions to date. If the Host Checker should fail go to Step 11 below.

6) If your computer passes the Host Checker requirements you will see the following screen:

Once the above splash page loads the end user should click the "Network Connect" Start button to engage the network access. Keep in mind that there could be a delay as the network connectivity is engaged.

Once a successful connection is made, the view is returned to the splash page. At this point the end user is on the DNR network and can connect to applications as if they were working from the DNR office.

7) The end user can validate their network connectivity by clicking on the SSL VPN icon in the open applications list on the bottom right hand corner of their desktop.

Figure 2 - System Tray

Figure 1 - Juniper Network Connect Icon

When the icon is highlighted with the mouse it will show "connected":

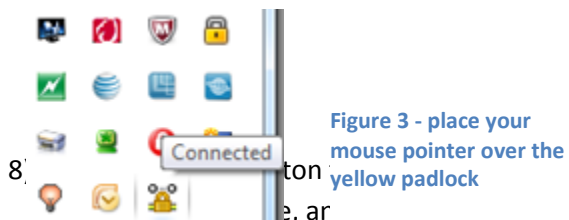

Figure 3 - place your mouse pointer over the yellow padlock

VPN icon to select the Advanced View, Basic

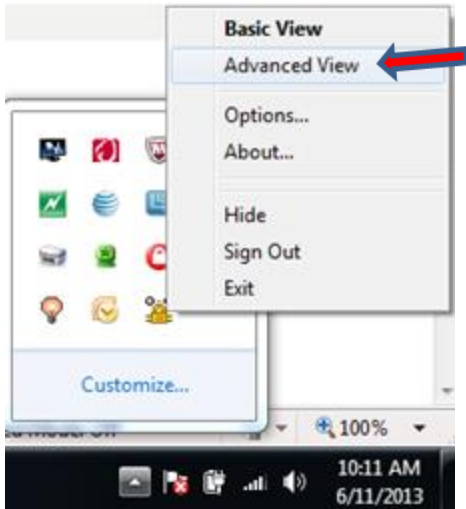

Figure 4 - Right clicking on padlock displays menu options

9) By selecting Advanced View you can verify your IP address and view diagnostic information

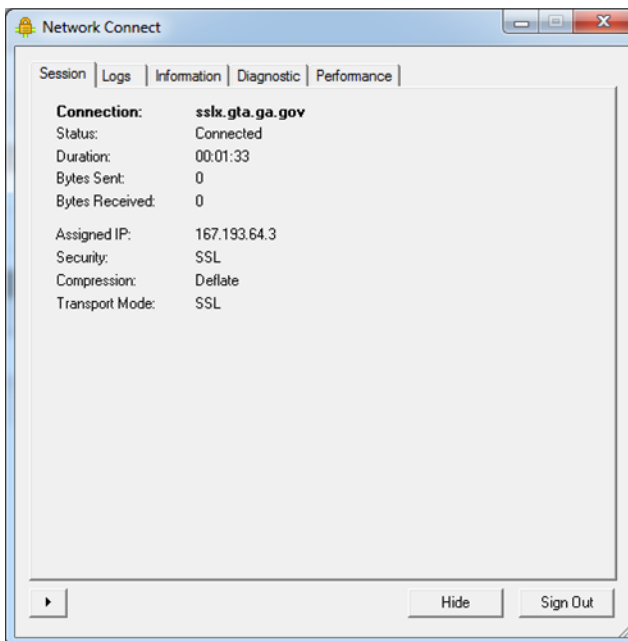

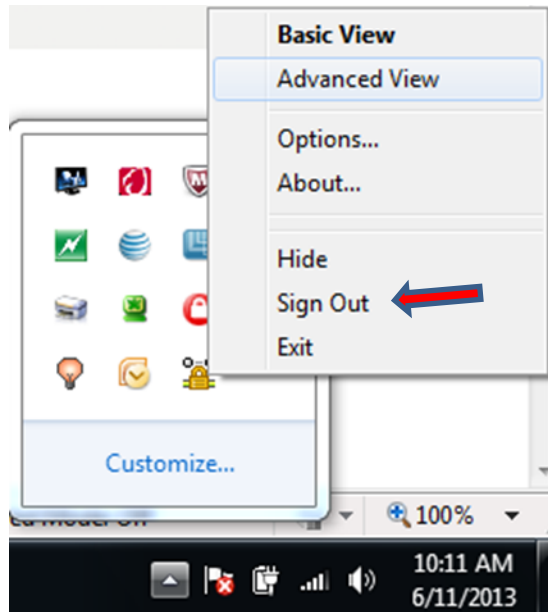

Figure 5 - Right clicking the padlock & selecting Advanced View

10) When you are ready to sign out, right click on yellow padlock and select Sign Out.

11) If you fail the Host Checker either because you don't have the registry key provided above or you don't have an Anti-Virus product or your definition files are out of date you will receive the following screen and will not be allowed to sign in until you correct the problem:

If you need help resolving any host checker issue you should contact your Agency support to open a ticket with the Consolidated Service Desk at 877-GTA-3233 for SSLVPN issue.
