

Architectural History

The Department of Natural Resources – Historic Preservation Division Historic Preservation (HPD) Consultants Directory is divided into eight sub-directories, one each for the preservation disciplines of Archaeology, Architectural History, Engineering, Historic Architecture, Historic Landscape Architecture, Historic Preservation, Historic Preservation Planning, and History. Other aspects of the Consultants Directory are the User Instructions, the Professional Qualification Standards, and the Application Files.

The consultants listed are self-nominated; the only requirement for inclusion is a consultant's submission of a completed information packet. Users of the Consultants Directory are encouraged to read the User Instructions and Professional Qualification Standards before researching the Directory.

Inclusion in this Directory does not represent an endorsement, recommendation, evaluation or assumption of responsibility for the quality of work of any listed consultant. There is no representation implicit or implied that any work product produced by those listed will meet federal or state requirements. There is no representation implicit or implied that the information provided by the consultant is accurate - - it is made available as provided. Users of the Directory should contact at least three consultants and check references with previous clients as part of their own individual investigation and judgment regarding the reputation, cost, and quality of any particular firm.

Each page of the Consultants Directory provides entries for a number of firms or individuals. These firms have filled out a data sheet and furnished other information, which has been reviewed by HPD staff to determine if they meet the *Secretary of the Interior's Professional Qualification Standards*.

The organization of the directory pages is as follows:

- The first column of the entries contains the firms' contact information in alphabetical order.
- The second column contains the firms' Preservation Profession(s). In this column is also a check-box, which if marked means that the firm has been evaluated as meeting the *Professional Qualification Standards*. A blank check-box indicates that the firm offers services related to that profession, but has not provided sufficient information that corroborates they have met the associated *Professional Qualification Standards*. Firms that have more than one Preservation Profession listed in the second column will also be listed in the sub-directory for those other disciplines.
- The third column contains the listing of the firms' Standard Preservation Services. These services are from a list of typical services as established by HPD.
- The fourth column contains the listing of the firms' Other Preservation-Related Services. These are products and services that may be a specialty of an individual firm or could be considered a sub-category of one Standard Preservation Services. For more information about the Other Preservation-Related Services, please refer to the Glossary.
- At the bottom of each page is a date and pagination. This information is provided so the user can check for the most recent update of the Consultants Directory and is aware of its length.
