

Hazard Analysis and Critical Control Point (HACCP) Training

Learn how to plan for minimizing introductions of Aquatic Invasive Species!

The Georgia DNR Wildlife Resources Division is partnering with the US Fish and Wildlife Service to host a **FREE** training to educate biologists, technicians, and other participants on developing and applying HACCP plans to minimize the potential for moving or introducing Aquatic Invasive Species during field activities. A multitude of non-native plants, animals, and even diseases continue to be a threat to GA, and our best chance to minimize their impacts is to **PREVENT** their introduction. Join us and learn how **YOU CAN HELP** in these efforts.

Date: **June 24-25, 2025 (Save the Date)**
Location: **Laura Walker State Park (Waycross, GA)**
Instructor: USFWS staff

The training includes:

- 1) Introduction to the HACCP process
- 2) Understanding invasive species pathways
- 3) Developing plans to remove hitchhiking species
- 4) Learning how to apply the 5-step HACCP process in your job.

For more information, visit <https://www.fws.gov/program/hazard-analysis-and-critical-control-point-planning-prevent-spread-invasive-species/what-we-do>

TO REGISTER: Register online at <https://arcg.is/1PPv1v0> ; or email Jim.Page@dnr.ga.gov. **Deadline May 1st** - Space is limited! Don't delay!!

COST: Training is provided "free of charge" to attendees. Attendees are responsible for their own travel and meal expenses. Lodging may be provided at no charge for the first few applicants who sign up until spaces are filled.

AGENDA and travel info: Will be forthcoming upon confirmation of registration
