

## **QUAIL DIET RESEARCH PROJECT**

### **Project Description-**

- A Research Project at Abraham Baldwin Agricultural College (ABAC) is looking for hunter-harvested wild quail crops on public land.
- With the collected crops a comparison of food habits between public and private land will be conducted.
- Each crop's contents will be catalogued.

### **How Can Hunters Help?-**

- If you harvest a wild quail and choose to contribute to the project, please follow the steps below.
- Crops need to be placed in a plastic ziplock bag and frozen. Please record date and location of harvest as well as one wing (needed for sex and age).
- Please use the contact information listed below to schedule crop pick up at a later date.
